

  Razorpay Core Pain Points ▾

"Is this novel? The ML prediction isn't — Razorpay's 2021 paper is better than mine. But the product application is. Nobody at Razorpay asked: 'If we can predict terminal failure, can we also predict when to pre-position capital?' I asked that question. I built the answer."

Bottom Line

Your idea didn't decrease. **You grew up.**

You went from "I have a cool hackathon idea" to "I understand Razorpay's business, their technology, their regulations, and their gaps — and I built something that fills one of those gaps."

That's exactly what Razorpay wants in an intern.

Build PISI. Cite their paper. Show the gap. Win.
